

**Table 2. Directly Adjusted Probabilities of Survival
and Uninterrupted Improvement
(and Standard Errors*)**

| | | 6 Months | | 1 Year | | 3 Years | |
|----------------------------------|------|----------|--------|--------|--------|---------|--------|
| | | Pr | SE | Pr | SE | Pr | SE |
| <i>Survival</i> | | | | | | | |
| Medical | .926 | | (.022) | .902 | (.025) | .790 | (.040) |
| Surgical | .903 | | (.039) | .891 | (.040) | .846 | (.049) |
| <i>Uninterrupted Improvement</i> | | | | | | | |
| Medical | .359 | | (.042) | .226 | (.040) | .126 | (.036) |
| Surgical | .669 | | (.059) | .452 | (.060) | .298 | (.057) |

NOTE: Standard errors (SE) for the adjusted proportions were calculated following Mos-
teller and Tukey (1977, Chapter 11c).
